Boston Analytical to Host Open House at Modern New Facility on May 11, 2017
Lab tours showcase capabilities and festivities celebrate 30 years in business!

Salem, NH (April 11, 2017) - Boston Analytical, the Life Sciences Division of Alpha Analytical, is having an open house on Thursday, May 11, 2017 from 3pm to 7pm to showcase its new building with advanced lab technologies and diverse analytical testing capabilities. It is also celebrating 30 years in business.

Tours of the facility will be provided every 15 minutes taking visitors around the 30,600 square foot building and through its microbiology, chemistry and extractables & leachables laboratories. Since moving into its new building, Boston Analytical has increased lab capacity by 55% and stability storage by 130% with eight new chambers including a large capacity walk-in chamber.

Upon conclusion of the tour, guests will enjoy hor d'oeuvres, beverages, music and will receive a gift bag upon departure. Attendees who are interested in learning more about Boston Analytical's capabilities will have the opportunity to speak to staff in one of its many conference rooms. Original Boston Analytical employees will be on hand to share stories on the history of the company.

For more information about the event, or to register to attend, please contact Deb Carbone at dcarbone@bostonanalytical.com.
